Let's start! We're going to the Lands Between, so it's time to travel!

THE STORY:

Rise, Tarnished, and be guided by grace to carry out your mission, so that you can become an Elden Lord in the Lands Between. They say that the lands between are filled with the mortal remains of people who have died in battle.

In our world, dragons are extinct. Even worse, legends of dragons are spreading. The situation in our world is in a terrifying state. Many adventurers have come to the land between. Because of things like raids and Dragons, the lives of the people of the land between are getting worse and worse. Little by little, life in the land between has become a stagnant swamp of depression. Anyone who enters the land between in the hope of becoming a Dragonrider has the one mission of saving the world from the menace of the forces of evil, the bloodthirsty demons that have appeared everywhere.

Unfortunately, the person in charge of this mission is a human... While the Dragonriders are the ones who deal with the monsters, who can be a substitute for you?

He is a remnant from an otherworld that lost its Star in the War of Destruction. Lord Tarnished, a grand dragon who has breathed in all the blood of other dragons, lies on the ground in a completely dark state. His eyes have become a mirror of insanity. He is imprisoned by the military, and the evil forces that has invaded otherworld with the help of the Dragonriders through dragons and monsters intend to sacrifice him as a Dragon of Death. And the terrible people who run the military group are preparing to unleash hell itself with the permission of that evil emperor, who returns from the dark recesses of hell.

How can you possibly write a review for an RPG where there is no dialogue? At this point, you would think to be this is an RPG? In fact, if this game actually came out a year ago, I would have had NO OTHER choice than to call it "The ONLY game in which you can CHOOSE to be silent"! ONLY, because no other game offers the option of silent play like this one does. However, for the past year, it has been in development, and now it's finally here. I have been playing this game off and on for a year now, and the only time I hear the voices of the characters is when we meet with another player to play synchronously. So, no dialogue... no, no! this is not an

RPG! no, not an RPG... ..yeah, I know it can't be an RPG because there are no dialogue and no way to be silent. But after a year of playing this game, I don't know what else to call it. When you do meet up with the other people playing on the same server, you would feel like you're in a full-fledged multiplayer game. But, there are even more features. For example, by helping out the other players in your group, you can earn gold and other items and get a status boost. The status boost is important, because it lets you do more powerful things in the game. If you're stuck in a difficult area, for example, you can ask others to take you to safe areas where you don't have to put up with enemies anymore. Also, they can equip special items to make their own adventure more effective. The way you interact with the other players is through the party chat. This is a feature that is not just limited to dialogue. Like in traditional RPGs, you can talk to other players in the party to arrange for an alliance or share tips. You can even use a little friendly trivia and end with a joke. The game takes the concept of party chat and expands it with the idea of actually talking. After I play this game for a while, it feels like every day is a vacation. There's a lot of freedom involved, and you can live your life entirely through the actions you take. The universe of the game has a certain depth, bff6bb2d33
