ReUse CAD - Hosted by Autodesk, ReUse CAD is an application for managing and reusing CAD drawings that the user can save to their cloud storage. Business process solutions Autodesk Inventor BPM (Business Process Manager) - supports BPEL (Business Process Execution Language) or BPMN (Business Process Model and Notation) for defining business process flow. Autodesk Inventor BPM may be compared to other BPM tools like Rational Rose, Tibco Business Workbench, JBoss BRMS. The comparison of BPMN to other formal methods is ambiguous, as BPMN has been influenced by these other modeling tools. CAD/CAE/CAM Autodesk MEP enables architects to use an industry-standard model of spaces, furniture, and electrical, plumbing and HVAC (heating, ventilation and air conditioning) components to create 3D-based information on computer-aided design (CAD) models. MEP employs a graphical user interface (GUI) based on Autodesk's Navisworks platform. MEP's GUI-based approach has evolved since Autodesk first released MEP in 1994. Autodesk have since then released several different versions of MEP, some supporting only specific 3D CAD applications and others supporting different 3D CAD applications in a common framework. In 2011 Autodesk began the process of moving MEP to a new platform called Revit Architecture, where MEP would be the base for architecture applications in the same manner as MEP is used for MEP. Some MEP users have complained that the changes made to MEP to move it to a Revit-like architecture have made MEP too expensive to use, due to its large file size. AutoCAD Architecture is a graphical user interface (GUI)-based program for 2D architectural drawings. This product is an update of AutoCAD's MEP product. It runs on Windows and Mac OS X. AutoCAD Civil 3D is a software application for civil engineering modeling. It is a GUI-based program, based on Autodesk's Civil 3D. AutoCAD Electrical is a suite of tools for electrical engineering.
